Examiner: Ricky D. Shafer
Group Art Unit: 2872

Amendments to the Specification:

Please add the following new paragraph after paragraph [0032]:

Figure 21 is an exploded view of a portion of the tilt actuator assembly of Figures 2-14 illustrating an alternate embodiment of the ball and socket assembly.

Please add the following new paragraph after paragraph [0054]:

Figure 21 illustrates an alternate embodiment of the tilt actuator assembly of Figures 2-14 in which the ball and socket are switched between the reflective element assembly and the actuator assembly. Thus, the glass case 26 of the reflective element assembly 16 comprises the spherical head 54 and the shaft 50 of the jack screw 46 terminates in the socket 66. The coupling of the spherical head 54 with the socket 66 is identical to that described above for the jack screw 46 comprising the spherical head 54 and the glass case 26 of the reflective element assembly 16 comprising the socket 66.
